

@drewrod34

hey, I dont know where you are but we have a question to ask you

Rahul here is looking for a group but cant anyone

he asked to join as our 5th

(he submitted his own repo if you are interested)

Mario, Hami, and I are fine with Rahul joining us, but I wanted your opinion first

drewrod34 11/13/24, 12:33PM

checking his repo rn, hold on

Quintilium 11/13/24, 12:33PM

according to him he did it all on his own

his group members didnt help him

Rahul 11/13/24, 12:36PM

i have the basic authentication working with a database connection, I had to make 4 vms across 2 laptops because i was being held up by my group members, which is why it is very basic at the moment

@Rahul i have the basic authentication working with a database connection, I had to make 4 vms across 2 laptops because i was being held up ...

drewrod34 11/13/24, 12:37PM

Huge, cuz that is something we weren't able to get down on time

i did notice that the login.html file had the same problem I was complaining about before (css styling being hardcoded in the file), but that's just me being annoying, so no worries, that can be cleaned up later

Rahul 11/13/24, 12:37PM

but i think through doing this work myself I have a good understanding of how this system is supposed to work

Quintilium 11/13/24, 12:37PM

so you are fine with him joining?

drewrod34 11/13/24, 12:37PM

yeah, we at least have a stronger foundation now, so we can actually focus on learning the other stuff we need to do

And thus, I can actually worry about figuring out MFA

so welcome to the group @Rahul

Rahul 11/13/24, 12:43PM

thank you i appreciate it! just to have it mentioned, im on campus from monday - wednesday regularly and i can come on campus thursday and friday as needed

Mario_Levano 11/13/24, 12:45PM

Zerotier Network Code: 3efa5cb78ade488b

Rahul 11/13/24, 12:46PM

sudo zerotier-cli join 3efa5cb78ade488b

 **Hami Chauhan** 11/14/24, 8:02PM
So @all
Whats the plan for tommorow
because I need to know before because I don't come to campus anyways on friday
So I would have to only for the meeting if we decide to have it

 **Quintilium** 11/14/24, 8:04PM
I will be on campus tomorrow

 **drewrod34** 11/14/24, 8:23PM
I have class at 8:30 am and at 1pm, so I'm fine with whatever

 **Hami Chauhan** 11/14/24, 8:24PM
@Mario and @Rahul How about you'll (edited)
Because only if everyone's there would we be able to work on it together
If even 1 person is not there, then that can create a discrepancy

 **Rahul** 11/14/24, 10:17PM
yeah i can be there

 **Hami Chauhan** 11/14/24, 10:20PM
@Mario_Levano How about you? (edited)
Because I don't come to campus on Fridays so I need to be sure and confirmed about the meeting
It would have been great if we met like after class on mondays, and wednesdays

 **Mario_Levano** 11/14/24, 10:36PM
Yea, I can go to campus tomorrow, sorry I haven't replied, I was at work

November 15, 2024

 **Hami Chauhan** 11/15/24, 9:57AM
Hi All, I am not feeling well at all today so I won't be able to attend the in person meeting
I apologise because of that. But you'll could continue with the meeting. if you want you could send me a meeting link so that I can join virtually.
9:59AM I hope you all understand
I can join from where you'll left off when we meet next time in person if virtual is not possible (edited)

 **Mario_Levano** 11/15/24, 10:32AM
That's ok, who else is on campus, because I just got here

 **Rahul** 11/15/24, 10:40AM
i'm on the way rn running late my b
i live an hour away

 **Mario_Levano** 11/15/24, 11:06 AM
you good, how about @drewrod34 and @Quintilium , are you guys on campus? (edited)

 **Quintilium** 11/15/24, 11:17 AM
I'll be there in a few minutes

You're viewing older messages 27 AM

Message #general

And we can talk loud here

Mario_Levano 11/15/24, 12:03 PM

Alright, I'll go back

Quintilium 11/15/24, 12:03 PM

Sorry

@Rahul you coming too?

Rahul 11/15/24, 12:04 PM

yeah otw

Quintilium 11/15/24, 12:04 PM

Ok

Mario_Levano 11/15/24, 11:20 PM

Hey guys, bit of an update, so, for the ones that came to the meeting, you guys already know, but for the others, I have figured out how to make the dev, prod, and qa VMs have their own unique ip addresses, and make sure that some nodes don't interact with others. This would basically solve one of the deliverables, for the dev, prod, and qa clusters, at least for the most part. After this however, we'll then get started on making the deploy vm and do the systemd

November 16, 2024

Hami Chauhan 11/16/24, 10:51 AM

So I have created the deploy server on my machine (edited)

but I have created the virtual machine yet

But there needs to have more work to be done

So just asking who all were present at the in person meeting?

Also do you want to meet virtually today? (edited)

Hami Chauhan 11/16/24, 10:58 AM

So that we can talk and discuss further

November 18, 2024

Quintilium 11/18/24, 11:41 AM

@Rahul you coming today?

Rahul 11/18/24, 11:41 AM

yeah parking rn

November 20, 2024

**Quintilium** 11/20/24, 11:45 AM

@Rahul are you coming to class today?

**Rahul** 11/20/24, 12:12 PMhad a rough stomach this morning and wasn't feeling well i'm on the way to campus rn tho
are we planning to meet up outside of class too i can still meet today**Quintilium** 11/20/24, 12:23 PM

we want to meet friday again

November 21, 2024

**Hami Chauhan** 11/21/24, 4:34 PM

So its confirmed right that we will be meeting from 10-1 tommorow

Everyone be there

Where will we be meeting though?

**Hami Chauhan** 11/21/24, 4:41 PM

Also, Can I just know what your personal midterm deliverables were or what deliverables could not be completed?

**Rahul** 11/21/24, 5:46 PM

is it possible to meet at a later time?

**drewrod34** 11/21/24, 6:05 PM

I cant meet later, I got class at 1

**Rahul** 11/21/24, 8:28 PM

sorry i don't think i can meet in the morning i can meet later in the day, if you guys can meet later in the day on call that can work too

**Hami Chauhan** 11/21/24, 9:53 PMI can also meet only till 1 in person tommorow (edited)

after that I would have to meet virtually

@drewrod34 , @Mario_Levano @Quintilium But for us the meeting is still on right tommorow starting 10 ? (edited)**Quintilium** 11/21/24, 9:54 PM

I will be on campus tommorow at 10

**Mario_Levano** 11/21/24, 10:23 PM

I can be on campus a around 10a, but I can try to do a virtual meeting sometime after 4p

November 22, 2024

**Hami Chauhan** 11/22/24, 7:12 AM

ok so the meeting is on for today ?

**Mario_Levano** 11/22/24, 8:27 AM

Yea, if everyone else who's coming still is going to

**Hami Chauhan** 11/22/24, 9:24 AMBecause I am already here (edited)**Mario_Levano** 11/22/24, 9:45 AMYou're viewing older messages @drewrod34 , are you two going to be on campus soon, I will get there a bit after 10. [Jump To Present](#)

ok so the meeting is on for today ?

Mario_Levano 11/22/24, 8:27AM

Yea, if everyone else who's coming still is going to

Hami Chauhan 11/22/24, 9:24AM

Because I am already here (edited)

Mario_Levano 11/22/24, 9:45AM

Ok, @Quintilium and @drewrod34, are you two going to be on campus soon, I will get there a bit after 10.

Quintilium 11/22/24, 9:45AM

I'll be there

Mario_Levano 11/22/24, 9:46AM

If you guys get there soon, maybe try to reserve a room at ckb to use so we don't run around again

Quintilium 11/22/24, 10:00 AM

I found a table

It's where we met last time

In ckb (edited)

Hami Chauhan 11/22/24, 10:14 AM

So you are here in CKB @Quintilium ?

Quintilium 11/22/24, 10:14 AM

Yes

Hami Chauhan 11/22/24, 10:14 AM

ok I will be there

where is the table exactly though? (edited)

Hami Chauhan 11/22/24, 10:21AM

@just a heads up mario, I james and andrew have met together

Mario_Levano 11/22/24, 10:24 AM

Ok, I just parked on campus, I'll be there soon

Hami Chauhan 11/22/24, 10:24AM

no worries

Mario_Levano 11/22/24, 11:16AM

Hey @Rahul, since you are not able to make it to the physical meeting, when you have time, on your QA and PROD VMs, uninstall zerotier

sudo snap remove zerotier

sudo rm -rf /var/lib/zerotier

After that, reinstall it in order for those VMs to have different IP Addresses.

no worries

 **Mario_Levano** 11/22/24, 11:16 AM
Hey **@Rahul**, since you are not able to make it to the physical meeting, when you have time, on your QA and PROD VMs, uninstall zerotier

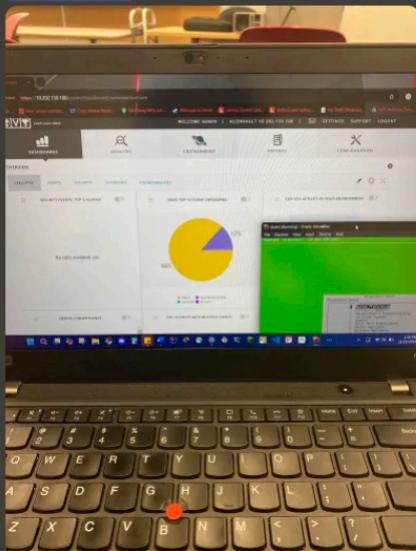

```
sudo snap remove zerotier
sudo rm -rf /var/lib/zerotier
```

After that, reinstall it in order for those VMs to have different IP Addresses.

Then, rejoin the network with the network id: 3efa5cb78ade488b

Lastly, make sure that each VM cannot ping each other using ufw reject. Also, would you be able to meet Tuesday at 10a, since next Tuesday is going to follow a Thursday schedule?

 **drewrod34** 11/22/24, 1:46 PM
@everyone I got ossim set up, now I just need to add the machines to the config and go from there

(Turns out I needed to set network type to bridged adapter instead of NAT)

 **Quintilium** 11/22/24, 2:12 PM
Remind me, we want a 2fa yes?

 **drewrod34** 11/22/24, 2:13 PM
Yeah, the link I posted here also has captcha code

 **Hami Chauhan** 11/22/24, 7:09 PM
@drewrod34, really appreciate your efforts on getting ossim set up

November 23, 2024

 @Mario_Levano Hey **@Rahul**, since you are not able to make it to the physical meeting, when you have time, on your QA and PROD VMs, unin...

November 23, 2024

@Mario_Levano Hey @Rahul, since you are not able to make it to the physical meeting, when you have time, on your QA and PROD VMs, unin...

Rahul 11/23/24, 12:14PM
Yeah i can meet at tuesday at 10. My VM's are set up currently with my project configurations, wanted to know what we are gonna do moving forward at least for authentication. Like Hami said we should probably have that foundation to go off of, so i wanted to know if we wanted to use what I made and get that configured between all of us and then do the QA/prod/dev on top of that. or if you guys have a semi-woring system that the original group was working on, we can get that developed so at least we are up to the midterm deliverables at least. up to you guys but just wanted some clarificaiton on that

November 24, 2024

Hami Chauhan 11/24/24, 4:01PM
Hi @Mario_Levano tommorow, Can you set me up with the firewall in my vm as well
So that I could start working on one of the other deliverable

Hami Chauhan 11/24/24, 5:53PM
@drewrod34 Hi, for the signuphomepage, did you use bootstrap? (edited)
because I was just working on the responsive design deliverable so wanted to ask

@Rahul Yeah i can meet at tuesday at 10. My VM's are set up currently with my project configurations, wanted to know what we are gonna do ...
 Hami Chauhan 11/24/24, 7:35PM
@Rahul Yes, lets try to get it implemented together tommorow on the existing project itself (edited)

November 25, 2024

Hami Chauhan 11/25/24, 11:34 AM
@Rahul @Mario_Levano @drewrod34 Are you all coming to class today?

Mario_Levano 11/25/24, 11:34 AM
Yes, I just parked

Hami Chauhan 11/25/24, 11:34 AM
oh ok

drewrod34 11/25/24, 11:37 AM
Yeah, I'm waiting for boba from sac event

Mario_Levano 11/25/24, 11:48 AM
sudo ufw allow 80
sudo ufw allow 443
sudo ufw allow 53
sudo ufw allow 5672
sudo ufw allow 15672

for firewall, allows access to internet and rabbitmq, if needed

Hami Chauhan 11/25/24, 4:54 PM
So we will be meeting at 11?

Mario_Levano 11/25/24, 5:04 PM
Yes

Hami Chauhan 11/25/24, 5:04 PM
till what time ?

You're viewing older messages made the bundles and installer in python

Mario_Levano 11/25/24, 5:05PM
Until 12:30-12:45, I have a class at 1, so as long as it is before 1

Hami Chauhan 11/25/24, 5:05PM
So do you want me to create the deploy script in python as well
Oh ok got it
or php

Mario_Levano 11/25/24, 5:07PM
I think python might be better for the script, but you can do whichever is most comfortable for you to work with

Hami Chauhan 11/25/24, 5:08PM
Yes, let me start working on the script in python then

Hami Chauhan 11/25/24, 5:38PM
[@drewrod34](#) Hi Andrew, just a quick question. What directory path do you have Nagios located in? (edited)

drewrod34 11/25/24, 5:42PM
I'm not doing nagios, I'm pretty sure Mario said he'd do it

Hami Chauhan 11/25/24, 5:42PM
Oh ok Sorry

Mario_Levano 11/25/24, 5:42PM
O, yea, I'm working on Nagios
Already got some of it done, still needs some more set up to be ready

Hami Chauhan 11/25/24, 5:43PM
So Mario, what directory path do you have the Nagios program located in? (edited)

Mario_Levano 11/25/24, 5:45PM
Well, I set up Nagios on a separate VM, since it would be only monitoring our other VMs, installing it on one of my current one would probably slow it down a lot and take up resources

Hami Chauhan 11/25/24, 5:46PM
Yeah thats not problem
But like on what directory path have you had Nagios on

Mario_Levano 11/25/24, 5:46PM
I have it setup on the /tmp of the VM

Hami Chauhan 11/25/24, 5:48PM
/home/Mario/tmp
something like this?

Mario_Levano 11/25/24, 5:50PM
More like /tmp/Nagios, but that's mainly so I can then install it to the VM.

Hami Chauhan 11/25/24, 5:50PM
Oh ok Thank you

Rahul 11/25/24, 7:03PM
You're viewing older messages able to make it tomorrow anymore i share a car w my parents and i wont have it tomorrow [Jump To Present](#) ▼

Hami Chauhan 11/30/24, 5:55 PM
@all, just wanted to inform everyone
The responsive design deliverable and the deliverable of implementing ssl is also done.

2

December 1, 2024

Hami Chauhan 12/1/24, 5:03 PM
just want to ask who is doing the hashing password deliverable?

drewrod34 12/1/24, 5:18 PM
Me, I already said before that it was already done, but that we need the database working to test it and see if I need to do anything else

Hami Chauhan 12/1/24, 10:08 PM
Got it.
Sounds good. Tommorow lets see if we are able to get the database connections sorted as well

December 2, 2024

Quintilium 12/2/24, 8:38 AM
Class was just canceled

Do you guys still want to meet?

Quintilium 12/2/24, 8:55 AM
@everyone

Mario_Levano 12/2/24, 9:12 AM
We can still meet in the classroom, the prof said it is reserved for class time, but if you guys want to meet elsewhere, that's fine

Hami Chauhan 12/2/24, 10:30 AM
no lets just meet in class itself
during the class time
@everyone what say?

Quintilium 12/2/24, 10:36 AM
I'll be there

Rahul 12/2/24, 10:39 AM
running a little late but me too

Mario_Levano 12/2/24, 10:46 AM
I'll be there too

drewrod34 12/2/24, 10:56 AM
I'm still recovering from being sick last week so I'm staying home

1

Hami Chauhan 12/2/24, 11:44 AM
@Mario_Levano are you comming

Message #general

- Mario_Levano** 12/4/24, 9:26 AM
Hey guys, I'm not going to class today, feeling a little sick
- Rahul** 12/4/24, 9:47 AM
yeah i'm not gonna be able to come either i got a flat tire last night gotta get it fixed today
- Hami Chauhan** 12/4/24, 10:28 AM
@drewrod34 @Quintilium are you all coming to class?
- Quintilium** 12/4/24, 10:28 AM
Yes
- Hami Chauhan** 12/4/24, 10:29 AM
ok
I will come to class and work on the deployment script
as I have been doing so
- drewrod34** 12/4/24, 10:41 AM
Hey can I please get the list of ip addresses from zerotier?
- drewrod34** Hey can I please get the list of ip addresses from zerotier?
- drewrod34** 12/4/24, 11:33 AM
@**Mario_Levano**
- drewrod34** 12/4/24, 11:49 AM
Also @everyone reminder we only have 2 weeks left, so (again) we need to make progress quickly
- Hami Chauhan** 12/4/24, 11:50 AM
@**drewrod34** you are right. I am doing all the work that I possibly can
- Quintilium** 12/4/24, 12:24 PM
does anyone want to meet tomorrow or friday?
- drewrod34** 12/4/24, 12:49 PM
we need to meet up within a week and get the basic stuff up and running, and we need deployment done IMMEDIATELY, because if we dont have it done within this week, we lose points and we won't get personal deliverables and we won't have the opportunity for extra credit
- drewrod34** @**Quintilium** does anyone want to meet tomorrow or friday?
- drewrod34** 12/4/24, 12:50 PM
tmrw virtually, friday in person or virtual
And for the love of god can I please get the ip list it's been a week now
- drewrod34** And for the love of god can I please get the ip list it's been a week now
- Mario_Levano** 12/4/24, 12:54 PM
At most I can give you mine and James, I haven't gotten @**Rahul** ip addresses for prod and qa, you can add those after adding ours?
- drewrod34** 12/4/24, 12:55 PM
Just mine and whatever else is in zerotier at the moment is fine for now and thanks (edited)
I mainly need mine so that I don't suffer from ossim's ip being messed due to being on a dynamic network

Mario_Levano 12/4/24, 12:59 PM

All of them are labeled in some way to make it easier, and it would all be under the managed IPs mainly

Auth Address	Name/Desc	Managed IPs	Last Seen	Version	Physical IP
1AB290B226 8a526c1a5b74	Hami DEPLOY Deployment Server	172.25.25.223	4 days	1.14.1	72.68.30.61

1

drewrod34 12/4/24, 1:00PM

HUGE THX

Mario_Levano 12/4/24, 1:01PM

np, sorry about it, just wanted to get all the IPs ready before sending

Quintilium 12/4/24, 1:03PM

I can meet tomorrow and Friday in person or virtually

Hami Chauhan 12/4/24, 2:13PM

@drewrod34 I second your idea that lets meet tomorrow virtually and see whether we want to meet in person or virtual on friday

Quintilium 12/4/24, 3:45PM

Alright I think I'll do virtual tomorrow too

Rahul 12/4/24, 3:45PM

yup i can meet virtually too

Mario_Levano 12/4/24, 3:46PM

I can do tomorrow virtual

drewrod34 12/4/24, 3:46PM

I'll do my best to do so as well, cuz my laptop blue screened during my other class that's after 490

drewrod34 12/4/24, 4:03PM

Nvm, fixed it, just needed a BIOS update

Quintilium 12/4/24, 4:27PM

December 6, 2024

**Hami Chauhan** 12/6/24, 8:52AM

Are we meeting at 10 or 11 today?

**Mario_Levano** 12/6/24, 10:11AM

I think 11

**Hami Chauhan** 12/6/24, 11:08AM

Are @drewrod34 and @rahul not even coming for the meeting

**Mario_Levano** 12/6/24, 11:09AM

ik rahul said that 11 was fine, @everyone are you guys ready for the meeting?

**Quintilium** 12/6/24, 11:11AM

yes

**Hami Chauhan** 12/6/24, 11:11AM

same here

**Mario_Levano** 12/6/24, 11:15AM

ok, well, lets get in the voice chat and just have them join soon

**Rahul** 12/6/24, 11:16AM

yeah ill join in a couple min

**Hami Chauhan** 12/6/24, 11:17AM

its not letting me join

I joined

**Quintilium** 12/6/24, 11:27AM

ill brb

**drewrod34** 12/6/24, 6:34PMsorry for not saying anything today, was busy with personal stuff and also fixing my laptop
just wanted to ask how progress is going and if theres anything else you guys need me to do**Hami Chauhan** 12/6/24, 7:39PMthe deployment. I am already working on the deployment and its functions (edited)

but as you heard in class, that deployment is due within a week

so completing that as a group should be our priority

as professor did say in class previously that deployment is a really big and complicated thing so only me working on it won't be beneficial in a large way

December 7, 2024

@**Hami Chauhan** as professor did say in class previously that deployment is a really big and complicated thing so only me working on it won't b...**drewrod34** 12/7/24, 9:13AM

Mario already said some weeks ago that he got the bundler working, so rly the only thing is to get the actual website completely working and connecting the deployment parts together

December 8, 2024

**drewrod34** 12/8/24, 7:10PM

I just got back from a meeting, my laptop might be more cooked than I thought, so anyone is willing to let me set up Jupyter Notebook for me to work on it?

Mario already said some weeks ago that he got the bundler working, so rly the only thing is to get the actual website completely working and connecting the deployment parts together

December 8, 2024

 **drewrod34** 12/8/24, 7:10 PM
So just a quick update, my laptop might be more cooked than I thought, so anyone is willing to let me set up OSSIM and whatever else I was working on on their laptop, that would be great. At least so that my work is still accessible even without my laptop.

December 9, 2024

 **drewrod34** So just a quick update, my laptop might be more cooked than I thought, so anyone is willing to let me set up OSSIM and whatever e...
drewrod34 12/9/24, 9:33 AM
???

 **Rahul** 12/9/24, 11:26 AM
i'm otw to school but looks like there's an accident ahead so i'm stuck in traffic gonna be late

 **@drewrod34** ???
Rahul 12/9/24, 11:27 AM
you can set it up on my other laptop, let's talk more about it in class

 **drewrod34** 12/9/24, 11:31AM
Huge, thanks man

 **Quintilium** 12/9/24, 11:49 AM
@Mario_Levano

 **Mario_Levano** 12/9/24, 2:17 PM
Ok, before I forget, the command that i used to get the transfer working is

sudo ufw default allow outgoing

and for those that have DEV, QA, AND PROD VMs, make sure to install ssh and rsync on all of them in order for the file transfers can work properly

sudo apt install ssh
sudo apt install rsync

if already installed, then we should be almost done with deployment, all it would need is just Version Control and Rollback, it should not be too hard, it mostly has to do with keeping the files from each update on deploy and keeping track of the version, and if one update does not work on QA or PROD, then we can fall back on a previous working update

 **Rahul** 12/9/24, 2:58 PM
@drewrod34 had some installation issues for OSSIM, im gonna delete the VM and create a new one with the ISO image

 **drewrod34** 12/9/24, 2:59 PM
Was the issue "installation step failed on installing base"?
Because either more resources need to be allocated or you do need to create a new vm

 **Rahul** 12/9/24, 3:00 PM

Rahul 12/9/24, 3:00PM

drewrod34 12/9/24, 3:00PM

Crap, that I didnt encounter before

Rahul 12/9/24, 3:01PM

might be resource issues

let me try to allocate more and try again

drewrod34 12/9/24, 3:01PM

Yeah, usually that's what happens

We just need the vulnerability report, and after that we should be fine with not starting up OSSIM

Rahul 12/9/24, 3:12PM

you left everything else as the default values when setting it up, other than the IP address?

drewrod34 12/9/24, 3:19PM

I left mask as default and left gateway and host name blank

Also have the network setting be bridged adapter and not NAT for now

With a similar IP to the laptop itself so that there are no conflicts

Rahul 12/9/24, 4:28PM

damn it keeps getting hung up on the install software i tried like 3 times now with more allocated memory and its still the same issues

drewrod34 12/9/24, 4:36PM

Try putting an ip with only the 4th number being slightly different or just get a new iso image file

Rahul 12/9/24, 5:46PM

im on this now, i tried login: root and password: root1, rootone, root but none of them worked

Rahul 12/9/24, 5:40 PM

im on this now, i tried login: root and password: root1, rootone, root but none of them worked

drewrod34 12/9/24, 5:48 PM

I swear, this software would be so great if it weren't for this bs

Honestly, repeat the setup, and use a more secure password, for example, Vmstuff314

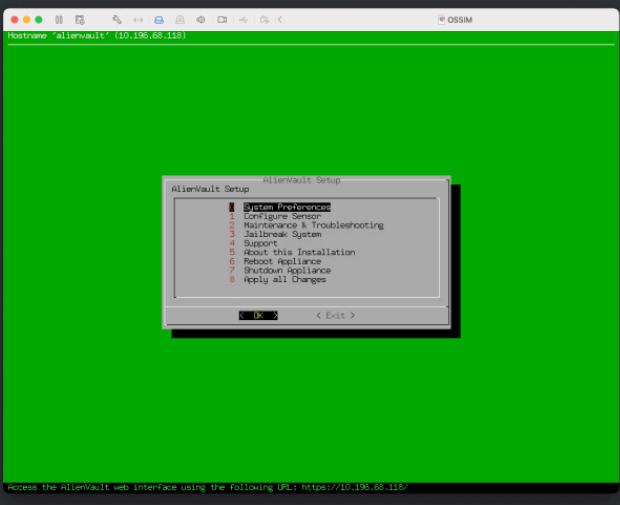

Rahul 12/9/24, 5:49 PM

bet

Rahul 12/9/24, 6:31PM

making progress, whats the setup steps again sorry

drewrod34 12/9/24, 6:33PM

Go to jailbreak system and have terminal open, then try the commands for setting up zerotier

Though **@Mario_Levano** was the one that did all the zerotier stuff so I'd say talk to him about that

Rahul 12/9/24, 7:05PM

should i leave the alienware firewall on or can i turn it off

drewrod34 12/9/24, 7:16PM
Firewall? I never saw an option about a firewall

Hami Chauhan 12/9/24, 8:10PM
So, are we meeting virtually
tommorow considering that we still have some deployment stuff to do
So we could all do it together

drewrod34 12/9/24, 8:11PM
i have a specialist appointment tomorrow i had ready since may
i had to call out of work too

Hami Chauhan 12/9/24, 8:11PM
so you would be busy the entire day?

drewrod34 12/9/24, 8:12PM
id probably be free after 4 or 5, so if you guys aren't available, just let me know what else I can work on from my home computer
(edited)

Hami Chauhan 12/9/24, 8:12PM
@everyone How about everyone else?

drewrod34 12/9/24, 8:12PM
at least so i don't feel useless while my laptop is still fried

Quintilium 12/9/24, 8:12PM
We want to meet virtually tomorrow?

Hami Chauhan 12/9/24, 8:13PM
I think Mario has a better understanding of what more do we need to add in deployment
as I did add whatever all I could

@Mario_Levano @Rahul should we meet virtually tommorow

to address the deployment completely

@drewrod34 Whenever you have a chance, can you send the ossim steps

so that I can add that as well to the server-documentation (edited)

Also add all your names on the change log document that I have created and shared

drewrod34 12/9/24, 8:28PM

OSSIM Configuration Steps

1. Download the ISO image file from the AlienVault website (should appear when searching OSSIM on goo)
2. Create a new virtual machine using the ISO image
3. Allocate at least 2 processors and a minimum of 4000-5000 MB of base memory
4. Start the virtual machine, and select the OSSIM installation process (should be the first option)

✓ Expand ↗

OSSIM Configuration Steps.txt 2 KB

Hami Chauhan 12/10/24, 6:01PM
@Quintilium Have you tested the 2FA code to see how it works
justed wanted to ask

Quintilium 12/10/24, 6:02PM
It's still a work in process

Hami Chauhan 12/10/24, 6:02PM
oh ok

drewrod34 12/10/24, 6:03PM
Wait so did you guys just did 2fa yourselves? I thought we were gonna test out what was in the code rn and then I would make changes depending on the results (edited)

Hami Chauhan 12/10/24, 6:04PM
I don't know about 2fa . I have not done anything on that
I just saw a file for it in github so thought to ask

Quintilium 12/10/24, 6:05PM
We don't have to use it

It's just there if we want it
If it's better to abandon that's fine

December 11, 2024

Hami Chauhan 12/11/24, 8:43AM
@everyone You all will be coming to class today right even with this bad weather?
Just want to ask beforehand (edited)

drewrod34 12/11/24, 9:18AM
Yeah
@everyone reminder that we all need to show up to show deployment and be able to get extra credit points,
Or at the very least you guys do, but I'm still showing up too

Rahul 12/11/24, 11:20AM
i'm running late i'll be there by 12 sorry

Message #general

December 12, 2024

**Mario_Levano** 12/12/24, 1:21PM

ok, im not sure if it matters too much, but i got nagios to work on my prod, will set the other prods tomorrow during our meeting.

I will try to see what else to do about deployment, if possible, **@Hami Chauhan**, If you happen to have the bundle from yesterday on your VM, try to have that recorded on the database, and make sure that it is automated, so that any new bundle we send you will be recorded without you having to put the information manually, since the prof will probably not allow that.

if anything, take a look at the deployment video that he uploaded a while ago on canvas to get a sense of what else to do to your deployment server (edited)

**Hami Chauhan** 12/12/24, 2:24PM

So I still have the bundle with me that was sent yesterday on the deployment server

**Mario_Levano** 12/12/24, 2:25PM

Ok, then try to work with it and make some sort of script or something that can record it on your database

**Hami Chauhan** 12/12/24, 2:26PM

but I don't have the database on my side

**Mario_Levano** 12/12/24, 2:26PM

You haven't made a database or table for the bundles?

**Hami Chauhan** 12/12/24, 2:27PM

So I did create a table that I created in github but like would I also need like username and password for logging into like the mysql and all of that

**Mario_Levano** 12/12/24, 2:30PM

Possibly, there should be a way to do it without needing a password to be created. But it is needed in order to help keep track of the bundles that are sent. Take a listen to the professors video about deployment on canvas

**Hami Chauhan** 12/12/24, 2:30PM

I did watch it a multiple times

and it does say that what fields we need in the database table so I did create like an example table in github

**Mario_Levano** 12/12/24, 2:32PM

Yea, keep in mind that the has to be on the machine itself, just like the way I keep the database and tables in the vm itself, it shouldn't be in the github (edited)

**Hami Chauhan** 12/12/24, 2:32PM

ok let me tranfer it to machine

**Hami Chauhan** 12/12/24, 2:58PM

just working on some deployment stuff

**Hami Chauhan** 12/12/24, 3:21PM

@Mario_Levano I was wondering we should have just a single folder for the deployment in github that will be easier and more organized

I have created the tables

The deployment video also said to create an ini file so doing that now as well

You're viewing older messages to have to write your passwords?

Jump To Present ▾

Message #general

ini files also require us to have to write your passwords?

So everyone who has dev, prod and qa machines, would you all be fine with it if I have them in this ini file in github (edited)

Mario_Levano 12/12/24, 3:30PM

If it is really needed, sure, Im fine with it

Hami Chauhan 12/12/24, 3:32PM

because in even the rabbitmq ini file, it has like the password mentioned so just wanted to ask

all

Also, so now since like we could not have deployment completed by a certain time, the extra credit and personal deliverables won't count

?

or we should continue trying on those as well

Mario_Levano 12/12/24, 4:08PM

Continue trying on the common deliverables, if we happen to get it right by the time of the final, we will then be able to get credit on the stuff we do.

Hami Chauhan 12/12/24, 4:08PM

yeah I see your point

@Mario_Levano Continue trying on the common deliverables, if we happen to get it right by the time of the final, we will then be able to get cr...

drewrod34 12/12/24, 4:09PM

Is this a given, or is this wishful thinking?

Mario_Levano 12/12/24, 4:10PM

Bit of both, but it does make some sense that he'll consider the other work we've done if we have deployment done the way he wants us to do it

drewrod34 12/12/24, 4:11PM

I guess, tbf we did have the extra stuff mostly done

Mario_Levano 12/12/24, 4:12PM

We probably still won't get personal deliverables cuz by the time of the final we would only have hours to do something even if he does happen to give it to us. And yea, I'm already almost done with Nagios, just need to configure it on James and Rahuls VMs Hell, ldc if he gives us partial credit for deployment and still considers the rest, but that is actually wishful thinking

Hami Chauhan 12/12/24, 4:15PM

But I mean there is no class, so we won't be able to meet him before final or something and the final project is due at 11 am

so I don't really see any changes of getting personal deliverables

Mario_Levano 12/12/24, 4:19PM

We are still going to have to go to KUPF 117 from 8:30am-11am for the final, so that's all the time we have to show him anything That is on Thursday the 19th

Hami Chauhan 12/12/24, 4:20PM

yes but as he said that he will be around 9:30

and the change log is also due before we come to class

so anything that we do not sure would even be counted

after the change log is done

You're viewing older messages

12/14/24, 11:36 PM

@Hami Chauhan this is what the pages would have looked like originally, with the index.php and index.css for login, and homepage.php and homepage.css for home

the other web pages would then use homepage.css for styling

drewrod34 12/14/24, 6:55 PM

Also @everyone while deployment is extremely important, we need to make sure that the web server is actually complete, database and all, so please let me know how far along we are on that, and if we don't have enough progress, focus on that

Hami Chauhan 12/14/24, 7:24 PM

Ok I will try to make these pages look like this in terms of styling (edited)
with the ones that I have created with bootstrap

drewrod34 12/14/24, 11:36 PM

Ok, since we have to submit and present the project on Thursday morning, we need actual hard deadlines for completing stuff, therefore:

Deployment should be done by Sunday or Monday night (since it is mostly done)

Web server functions/database by Monday or Tuesday night

Finishing touches and testing by Wednesday

Thoughts? @everyone

Quintilium 12/14/24, 11:36 PM

Makes sense

Mario_Levano 12/14/24, 11:40 PM

I can shoot for Monday night to try and finish up deployment, since I got work tomorrow

December 15, 2024

Hami Chauhan 12/15/24, 10:58 AM

sounds well

drewrod34 12/15/24, 3:16 PM

@everyone

@everyone

December 15, 2024

ProfessorKehoe Today at 9:06 AM

The next and last time is when the registrar has scheduled the final exam

We use that period for presentations since there is no final and it gives everyone the maximum time to work on the project as possible

That said I recommend getting there early to make sure the new room's wifi doesn't mess up your project

When the final period ends that's it.

You will also not be given time to complete deliverables

Just show what works

If your team shows up late, do not expect to get time to present

3

December 16, 2024

drewrod34 12/16/24, 2:11PM

@Mario_Levano @Rahul how are the deployment and the database coming along

Mario_Levano 12/16/24, 2:16PM

I almost figured out the auto installer for the prod and qa machines, but I am currently not home, but I will be soon to continue work on it. I have already tweaked the deploy, the bundler, and the process to send a bundle to deployment. They are automated and are more user friendly now since I have added the ability to select stuff through the file explorer

Hami Chauhan 12/16/24, 2:18PM

So, one you are like nearing finish, do let me know so we could configure and automate it from the deployment server side

Mario_Levano 12/16/24, 2:20PM

Nearing finish, there is currently an error with the auto installer not detecting the .zip file, it seems picky, cuz some work, and some don't.

Overall, I think I am near finishing, just need to fix that error and it'll be ready to go

Once I get the installer done, I will leave a message with instructions here for James and Rahul to get the custom service for the installer.

drewrod34 12/16/24, 2:35PM

Also send the instructions so that I can make my own dev, qa and prod machines, and so I can set up zerotier on them

And reminder that database and web server stuff should be done by tuesday

drewrod34 12/16/24, 7:58PM

How's progress now?

Cuz rn I'm looking at the 2fa code and the hashing code again to make some light additions

@everyone

Hami Chauhan 12/16/24, 8:02PM

me too I am also looking at that
along with some deployment

Cuz rn I'm looking at the 2fa code and the hashing code again to make some light additions

@everyone

**Hami Chauhan** 12/16/24, 8:02PMme too I am also looking at that
along with some deployment
and webpages**drewrod34** 12/16/24, 8:04PM

Appreciated, but please focus on what YOU are doing, the 2fa and hashing was MY part, try not to take work away from everyone, as that was one of my mistakes from back then

**Hami Chauhan** 12/16/24, 8:05PM

yeah you are right. My major focus is on my part only . But I was just looking into some other deliverables and saw it so thought to research a bit

**drewrod34** 12/16/24, 8:06PM

@Rahul is the database stuff close to being done? Deadline for that is Tuesday night

**Quintilium** 12/16/24, 8:43PM

is there something i should do? or are we waiting for more deployment development?

**drewrod34** 12/16/24, 8:45PM

I guess just help with the front end stuff still, because I would have said to help with database stuff but @Rahul hasn't said anything yet and we're strapped for time right now

**Quintilium** 12/16/24, 8:46 PM

ok

**Rahul** 12/16/24, 8:53PM

yeah i'm working on the database rn but are you guys available to meet tomorrow online

**Quintilium** 12/16/24, 8:58 PM

i can

**Mario_Levano** 12/16/24, 9:02PM

I can as well, I can start from 10am, to about 2pm

**Hami Chauhan** 12/16/24, 9:11PM

I can as well

but we will start the meeting at 10 or 11

@Mario, if you are done with nagios do send me its steps so I can add to the server documentation as well

**Mario_Levano** 12/16/24, 9:14PM

I am almost done, I need the other PROD VMs to install the nagios host service and edit some system file for it to be 100% ready

Mario_Levano 12/16/24, 9:14PM

I am almost done, I need the other PROD VMs to install the nagios host service and edit some system file for it to be 100% ready

drewrod34 12/16/24, 9:27PM

I got work tomorrow from 9am to 1pm and am busy after 7pm

Hami Chauhan 12/16/24, 9:41PM

@Mario_Levano no problem let me know when you are done. As I understand that we are focusing the most on deployment right now

@Hami Chauhan @Mario, if you are done with nagios do send me its steps so I can add to the server documentation as well

drewrod34 12/16/24, 10:03PM

Share the documentation too, I want to see if I remade my vm correctly and also so I can make my own dev qa and prod vms on my hard drive

Mario_Levano 12/16/24, 11:49PM

ok, will do tomorrow, I have mostly got the installer working, it is now just a matter of making sure that it can work on the PROD and QA VMs.

December 17, 2024

Hami Chauhan 12/17/24, 7:34AM

@drewrod34 So you mean share the google docs for the server documentation ? (edited)

drewrod34 12/17/24, 7:34AM

Yes

Hami Chauhan 12/17/24, 7:35AM

sure will send it as soon as possible

Hami Chauhan 12/17/24, 9:24AM

is the meeting at 10 or 11?

today

Mario_Levano 12/17/24, 10:40AM

11 is fine

Hami Chauhan 12/17/24, 10:42AM

ok sounds good

Hi andrew, can you provide me your email to share the documentation as there 2 people with the same name

drewrod34 12/17/24, 10:49AM

ar327@njit.edu

Hami Chauhan 12/17/24, 10:59 AM

thank you

I have shared the documentation

Mario_Levano 12/17/24, 12:07PM

ill be right back

Hami Chauhan 12/17/24, 12:09 PM

no worries

@drewrod34 ik you said you are busy after 7 but is it possible you can join for a little bit @7? we are planning to meet up again and i think we need to all talk about the system as a whole and understand what we have working and what we can show the professor. There are some things missing that makes the database hard to complete and test, like the webpages and the authentication system. I was talking to everyone and wanted to figure out what we are going to do about the authentication side of our system because without the basic login pages and others, its hard to say what exactly the database is doing or connecting to. I have the logic down for the session tokens and whatnot, but again without an authentication system or the actual pages related to our project, I think there is a roadblock of how much I can do on the database side

@Rahul @drewrod34 ik you said you are busy after 7 but is it possible you can join for a little bit @7? we are planning to meet up again and i t...
drewrod34 12/17/24, 3:48PM
Wait what??? I have authentication and the pages done in the login authentication folder on GitHub, how is it not working?

Rahul 12/17/24, 3:56PM
oh, i havent been able to access them and neither has mario, but i guess im a little confused on what are our functional pages. originally when i joined the group, my understanding was that I would integrate the authentication system i had working with my previous group into this project, but then hami apparently was working on her own login pages and whatnot, and you are saying that you have authentication done as well. whatever it is, i think we arent on the same page about the authentication system and at least speaking for myself, I just wanted a little more understanding of that side of the project. i hope this isn't coming off as pointing fingers at anyone, im just genuinely confused and wanted some more explanation about it from you guys as you have been working on this project long before i joined the group

**drewrod34** 12/17/24, 4:01PM

Oh for fucks sake

Dude, Hami has also been doing stuff that some of us were supposed to be working on, and I've been saying this for a while now too and warned her not to take work away from the rest of us. Hell, I even clarified what we were all gonna do from the beginning.

The login page is called index.php in that folder I mentioned, rly the only stuff that needs to be changed is the file paths and the connection info for rabbitmq, I just need you guys to work from there and verify that what I have does work, since I don't actually have a database on hand. So just focus on the database right now, and maybe the others can check and see that Hami doesn't do any drastic changes to the other webpages, because they were originally working with just php and css styling but she went and used bootstrap for them, so just make sure that doesn't break anything.

Sorry, it just feels like I'm repeating myself sometimes

**Rahul** 12/17/24, 4:11PM

no worries i get it, but that was my issue too and i hate to point fingers here but just like u said hami has been doing work that some of us have been doing . when we met in class i thought we discussed that it was a good idea or would be beneficial if i integrated my authentication system with your project. Now I could be wrong in that understanding, but I was working on that for a couple weeks and at least keeping mario updated about what i was working on until i found out through the log file that hami was creating her own pages. She never said anything about it previously until i asked about it during one of our meetings, and therefore i didnt see the point in continuing my integration process if the efforts i was putting in were just going to be replaced with something else. Whatever changes to the files or the repo in general are being made, i think those changes need to be noted and explained with the whole group so that we understand how the changes affect the process of the system. thats why i think we all lowkey need to hop on a call and actually talk about this and get a concrete understanding. I know you set roles for everyone in the beginning, but with hami doing the work of others its blurred the lines for me in what we are all exactly doing

**Hami Chauhan** 12/17/24, 5:00PM

@Rahul, I just proposed that idea but all the team members were against it as they did not disabandon the existing project. And so it was clear that the database processing that was lacking would be added into their existing project. So just because I said something once does not mean its final because its not an individual project and a group project and if they wanted it to keep thier project, I could not tell them to change it. So I continued with whatever they had

I never said that I coded them from the start these pages. I converted them to bootstrap so that they are responsive

@drewrod34 Also Andrew, I don't think I am doing anyone else work but myself because from the start, I have been saying that I can do the SSL and responsive design deliverable and the you all were fine with it so I don't know why there is confusion now and those are the 2 things that I did. Along with that I will also work on deployment (edited)

**Hami Chauhan** 12/17/24, 5:07PM

Also as far as taking others work, there are still all of these deliverables left, why is no one doing them ? Distributed Logging, Hotstandby, database replication, hashing password (edited)

**drewrod34** 12/17/24, 5:11PM

I did the hashing password already

And the 2fa

**Hami Chauhan** 12/17/24, 5:12PM

I also tried creating a log file yesterday because I just wanted to try out and work towards the disturbed logging
I am doing all this so that we as a group can get as much points we can.

@Hami Chauhan @Rahul, I just proposed that idea but all the team members were against it as they did not disabandon the existing project. ...

@Hami Chauhan @Rahul, I just proposed that idea but all the team members were against it as they did not disabandon the existing project. ...

Rahul 12/17/24, 5:17PM

lol ik what you say is not final, but we talked about it in class that we would integrate my authentication system bc it was working. by integrating what i had working had no meaning of abandoning what they already had, it simply was adding a functional authentication system that they didnt have at that point when i first joined. mario had asked me multiple times where i was in integrating the authentication pages so that he can also have the database working since at that point it was only living on his local machine. So with talking with him and having that understanding, as well as the fact that *you* brought the idea up to integrate my authentication pages from the beginning, i thought thats what we were doing. ill admit i cant say im sure about andrew and james opinion on this, and i shouldve gotten clarification from them as well at that time, but between us three at least i feel like there was an understanding that we were integrating my authentication pages and so that was what i was doing. Then you went and wrote that you are working on the authentication and login pages in the log file, with no heads up to the group. like andrew said, he was working on that with his original group before we both joined, and who knows whatever you added is functional with the rest of the system. you didnt show anyone what changes you made or explained them, and you added bootstrap to his pages apparently, which wasn't what he was originally working on either. so whatever us three have been doing in terms of the authentication side is completely conflicting. thats why i am confused on what is going on for authentication now. i was never under the impression that what you say is final, and same with any other individual in this group. I am going based off of group decisions, which is why when we first talked about it in class and after every meeting in class i kept saying i will keep working on integrating the authentication system, no one had anything to say against it

Hami Chauhan 12/17/24, 5:21PM

Ok So if you want I can remove the bootstrap and try to make it responsive only through CSS

drewrod34 12/17/24, 5:21PM

Plus, that kind of is on us for not checking the GitHub enough, but I just want to be sure that everything works together and isn't conflicting

Hami Chauhan 12/17/24, 5:21PM

if thats the major concern of having changes in webpage

@drewrod34 do you want me to remove the bootstrap. And try implementing responsive just through CSS?

Hami Chauhan 12/17/24, 6:51PM

Just one more thing. I added that I did create a navigation page which is has all the navigation links to different pages to make it more easier for use (edited)

drewrod34 12/17/24, 6:51PM

What does it look like?

Hami Chauhan 12/17/24, 6:51PM

its like a simple header nothing fancy

drewrod34 12/17/24, 6:52PM

Like from 202? Actually that's really useful, keep it

Hami Chauhan 12/17/24, 6:53PM

its a bit blank in the bottom because there is not much to add but we can navigate through different pages so its good. Yes 202 is a reference (edited)

drewrod34 12/17/24, 6:53PM

Nice

Quintilium 12/17/24, 7:37PM

**Hami Chauhan** Yesterday at 8:19 AM

Just a reminder everyone, please send me or write any documentation for the things you worked on as well as things to the log file. As even though on canvas, it says change log is due before 11 am tomorrow. I believe professor said in class, that groups should have the changelog submitted before coming to class. The document of the change log has already been shared. So, we can have it submitted by 9:30 to 10 the latest tonight (edited)

**drewrod34** Yesterday at 8:24 AM

Doesn't that also apply to the demo video we have to submit?

**Hami Chauhan** Yesterday at 8:27 AM

Probably I think we should ask the professor about this that is the demo video for people who cannot report to class tomorrow (edited)

or everyone

**drewrod34** Yesterday at 8:28 AM

No it's not, it's for accreditation, he said we all have to do it still

**Hami Chauhan** Yesterday at 8:28 AM

oh ok so we can decide a time and get that done as well because tomorrow anyways he said, we cannot do anything

**Rahul** Yesterday at 2:13 PM

@everyone are we planning to hop on a call today to go over the system and create the video together

**Hami Chauhan** Yesterday at 2:41 PM

Just a reminder everyone, please send me or write any documentation for the things you worked on as well as things to the log file. As even though on canvas, it says change log is due before 11 am tomorrow. I believe professor said in class, that groups should have the changelog submitted before coming to class. The document of the change log has already been shared. So, we can have it submitted by 9:30 to 10 the latest tonight

**Rahul** Yesterday at 2:42 PM

yes will have changes done by 10 latest

**Quintilium** Yesterday at 3:02 PM

I'm not sure what to submit for the log

Most of what I did recently was assist Hami with the front end

Should I just say that?

**drewrod34** Yesterday at 3:03 PM

Yeah, just say that and specify what you helped out with, if you wrote specific lines, say that as well

For example, In my case, I just wrote what I actually made and added to the repo in the log channel, as the rest was just me watching everyone's work and supervising (just like a typical lazy manager, now I feel dirty)

1

**Rahul** Yesterday at 3:24 PM

just to make sure, the log file channel in the discord is the same as what is in the google doc right, so whatever we add in the log-file channel should be also added to the doc

**drewrod34** Yesterday at 3:25 PM

Hami Chauhan Yesterday at 3:25 PM

yes if you want you can write it here as well as put it in google docs yourself if there is uncertainty

Rahul Yesterday at 3:25 PM

sure, just saw james post something and wanted to make sure for all of us

Hami Chauhan Yesterday at 3:26 PM

yeah but I am currently working on adding some other server documentation so have not copied and pasted James's response yet

Rahul Yesterday at 3:26 PM

no problem

also @drewrod34 im redoing the OSSIM set up again because before i was having issues

1

Rahul @everyone are we planning to hop on a call today to go over the system and create the video together

Rahul Yesterday at 3:28 PM

wanted to know about this. I think we still all need to hop on a call where we are all present and can talk about it together. We need to have a solid understanding between all of us before presenting

Rahul wanted to know about this. I think we still all need to hop on a call where we are all present and can talk about it together. We need to h...

Rahul Yesterday at 4:04 PM

@everyone sorry to keep bugging about this, but i need a response of whether or not we can meet and if we can decide a time to meet.

Quintilium Yesterday at 4:06 PM

I'm free for the rest of today

Rahul Yesterday at 4:07 PM

me 2 im just working on this for the rest of the day trying to finish up whatever can be done

Rahul @everyone sorry to keep bugging about this, but i need a response of whether or not we can meet and if we can decide a time to meet.

Rahul Yesterday at 4:11 PM

i do think this is an important meeting that we HAVE to have before presenting since i dont think all 5 of us have been able to get on a call together before. we can bounce questions off each other and get on the same page about the progress of this project

drewrod34 Yesterday at 4:13 PM

I am close to getting home, I've been out of town helping my dad at his job

1

So far, lk deployment is done or extremely close to, the pages just need tweaking, the database stuff is what I want to know more about, and the parts that I worked on are done, I just need you guys to test the code and see if it works, but I need the rest of the stuff to be done and ready for that

Rahul Yesterday at 4:17 PM

yeah, to test the code we need the server script to be running to have the pages functional and actually connect to the database and whatnot. You have the server running on your machine correct?

Rahul Yesterday at 4:30 PM

does 6pm work for @everyone

You're viewing older messages

Jump To Present ▾

Message #general

Quintilium Yesterday at 4:40PM
sure

Hami Chauhan Yesterday at 4:43PM
6 works for me

But we should decide on a time where everyone will be available to attend the meeting

Rahul does 6pm work for **@everyone**

Rahul Yesterday at 4:45PM

?? thats why i asked. if anyone has conflicts just say and we can choose a different time

@drewrod34 I mainly need mine so that I don't suffer from ossim's ip being messed due to being on a dynamic network

Rahul Yesterday at 4:47PM

what did u mean by this? will it affect while setting up ossim?

drewrod34 Yesterday at 4:58 PM

You have to set it up on zero tier or on a static IP or else it's gonna mess up because I tried it on the college network and the settings messed up because the IP's are dynamic there so they're always changing.

You can still change the IPAA in the VM settings, but it's just annoying to do so because then it risk something else being broken

Rahul Yesterday at 5:03PM

so im at school rn doing this, you are saying on the school network it wont work because of the dynamic ip address? I would have to do it at home on my own network?

drewrod34 Yesterday at 5:26 PM

Set up zerotier because that's how all of us have static IPs, if you just use the raw IP from the njit network, the next time you try to access ossim after shutting off and turning on the laptop, it will get messed up because the IP changes, so zerotier is meant to keep the IP the same to prevent that

So do ossim configuration first as usual, then set up zerotier stuff in the jailbreak terminal

Mario should help you with zerotier, as he is managing that

Rahul Yesterday at 5:27PM

yup in the process now for zerotier, finally got ossim set up and actually connected to the internet this time just waiting on mario for the authorization

drewrod34 Yesterday at 5:28PM

If the home network does end up helping more, do that instead, and make sure you can get the vulnerability scan report from the other vms

But right now do zerotier

(At least because that's how I described it in my design challenge)

Rahul Yesterday at 5:30 PM

sounds good

also it seems **@drewrod34** and **@Mario_Levano** are still in transit to get home, and i want to give you guys some time to settle down and do your own things at home before hopping right into this, so i think 6pm wont work for both of you does 7pm work?

Mario_Levano Yesterday at 5:33PM

I feel more comfortable at 7, gotta still do some stuff at home and eat as well, but I'll be ready by then

Rahul Yesterday at 5:34 PM

You're viewing older messages Jump To Present

 **Rahul** Yesterday at 5:34PM
yeah for sure, **@everyone** lets aim for 7pm, and andrew if you need some more time you can just hop on call once you are ready
 4 

 **Hami Chauhan** Yesterday at 5:37PM
Also, what time would all of you be coming to class tomorrow
Because I remmeber professor saying that he won't be arriving until 9:30 but we also only have until 11 to actualy show the project
So can we just finalize that we all should be there at 10 tommorw so that no one has to wait

 **drewrod34** Yesterday at 5:39PM
No, he said to be there earlier because the room can have problems and stuff can break at the last minute

 **Hami Chauhan** Yesterday at 5:39 PM
but you know even if like 2 people are early but others are not there, stuff can't even be tested
and those 2 people would just have to keep waiting

 **Quintilium** Yesterday at 5:40PM
I will do my best to be there at 8:30

 **Mario_Levano** Yesterday at 5:41PM
I have to drop off a family member at work at 8, so I might be a little late, but I will do what I can to get there on time

 **Rahul** Yesterday at 5:42PM
yeah lets try to all be there at 830 or earliest as possible, even if we have to wait for other members its better than assuming we will all be there at an exact time
and also thats why i want to have the meeting today as well, so that we can test everything and make sure its working and fix anything that isn't

 **Rahul** Yesterday at 5:50PM
@drewrod34 once you connected OSSIM to zerotier, how do you run the report

 **drewrod34** **@everyone** @drewrod34 I got ossim set up, now I just need to add the machines to the config and go from there 
Rahul Yesterday at 5:51PM
and how did you get to this

 **drewrod34** Yesterday at 5:52PM
Enter the ip address the ossim vm has at the top of its screen into a browser
If it's done correctly, it should take you to the web client or say insecure connection, just say proceed to website
Then make web client login info, and once you get into the web client, go to assets and add the vms.

Then create a scan job, choose the scan type, select the VMs, set the schedule, then save and run the scan job
Once it's done, go to environment > detection > vulnerabilities and look for the scan job, then export the report into pdf or csv format

 **Rahul** Yesterday at 6:00PM
its fine if the purpose is set to management?

You're viewing older messages Jump To Present ▾

Rahul Yesterday at 6:00PM

its fine if the purpose is set to management?

NIC	PURPOSE	IP ADDRESS	STATUS
eth0	Management	192.168.206.50	-

Information

- Management: The Management Interface allows you to connect to the web UI. This interface cannot be changed from the web UI.
- Network Monitoring: Passively monitor for network traffic. Will be set to promiscuous mode. Requires a network tap or bridge. You will need to setup a network tap or span.
- Log Collection & Scanning: Collect or receive logs from your assets, run an asset scan, or collect files. This requires remote access to your networks.
- Not In Use: Use this option if you do not want to use one of the network interfaces.

drewrod34 Yesterday at 6:03PM

Yeah, I just hit next for everything, until I was done with the get started stuff

Man, diction is great, I'm driving right now and it's pretty accurate

Rahul Yesterday at 6:05PM

I was watching the deliverable videos and the professor mentioned that OSSIM should be pointed to the PROD network and the report should be run on that, since the security issues doesn't really matter on dev or QA, as prod is the cluster that is presented to the end user. Just wanted to ask you all if the prod, qa, and dev clusters were supposed to be on their own network

drewrod34 Yesterday at 6:06PM

Just enter the prod vm IPs in ossim for the scan

Clustering I'm guessing more so involves the firewall rules

Quintilium Yesterday at 6:16PM

Do any of you know which building and room we are supposed to meet in?

Rahul Yesterday at 6:17PM

KUPF 117 8:30-11

Quintilium Yesterday at 6:17PM

Thanks

Rahul Yesterday at 7:02PM

james and i are in the VC, join when you can

need a couple minutes for my headphones to recharge lol

Hami Chauhan Yesterday at 7:21PM

give me a minute I will join

Mario_Levano Yesterday at 7:27PM

back

**Mario_Levano** Yesterday at 7:52PM

For Nagios:

```
sudo apt update
```

```
sudo apt install nagios-nrpe-server nagios-plugins
```

```
sudo nano /etc/nagios/nrpe.cfg
```

Find this line and add the underlined text:

```
allowedhosts=127.0.0.1,_172.25.39.163
```

Save it, then

```
sudo systemctl restart nagios-nrpe-server (edited)
```

**Hami Chauhan** Yesterday at 7:55PM

Hi Andrew, whatever information that you added, can you just add it to the change log document that I had sent a few days ago because I am just combining everything together that's why

**Rahul** Yesterday at 7:56PM

```
rahuljinka1@rahuljinka1-vm1:~$ sudo apt install nrpe nagios-plugins
```

Reading package lists... Done

Building dependency tree... Done

Reading state information... Done

Note, selecting 'monitoring-plugins' instead of 'nagios-plugins'

E: Unable to locate package nrpe

**Mario_Levano** Yesterday at 8:19PM

```
sudo apt install python3
```

```
cd Bundler_Installer
```

```
python3 bundler2.py (edited)
```

Rahul Yesterday at 8:23PM
this is the OSSIM vulnerability scan results

ScanResult_20241218_OSSIMVulnerabilityScan.xlsx
14.39 KB

Hami Chauhan Yesterday at 8:38 PM
but don't you think that we should tackle what we are doing right now
I can share the screen
give me a minute
I think simple searching the webpage is good
let me show

Hami Chauhan Yesterday at 8:45 PM
no it does not take us to that page automatically
I had to hit the back button
through index page
when I login, it prints login
I have not connected it to a database yet
I don't know about the processing. I just made it responsive
I can show you that
Do you want to see how its responsive
We also have to make a video

Hami Chauhan Yesterday at 8:52PM
But no one has told me to connect to any database
and the rabbitmq processing which was there. I did not change anything in that as well.
But I have it set to like the ip address
and its working
But that's not what I was responsible for
But in my older group, I did not work with database so I was not aware of how to go about it.
So you all can assist me right now
yes I did write some code to add it to the tables
no I have not tested it
Sure

Hami Chauhan Yesterday at 9:03 PM
sorry technical issue

I am back

1

So do you want me to put the code in the installer.py or
make a different file and put it there
Ok so

```
1  <?php
2
3  require_once('db_connect.php');
4
5  function Package($nameOfBundle, $versionOfNumber, $status_code) {
6      $conn = dbConnect();
7      $stmt = $conn->prepare("INSERT INTO Package ($nameOfBundle, $versionOfNumber, $status_code) VALUES (?, ?, ?)");
8      if (!$stmt) {
```

}

```

This is what I had written

Rahul Yesterday at 9:05 PM

back

Hami Chauhan Yesterday at 9:05 PM

Do you see my screenshot

ok

I believe let me check again just to confirm

I saw that you updated the db_connect file yesterday so I thoughts thats the database file

Oh so I would have to create a new database file for myself

So would it be looking like this

```

@@ -2,7 +2,7 @@
2   2
3   3     // Establishes connection to MySQL database
4   4     function dbConnection() {
5 -     $hostname = '0.0.0.0';
5 +     $hostname = '172.25.205.131';
6   6     $user = 'remote';
7   7     $pass = 'password';
8   8     $dbname = 'Sub_Service';

```

I am not changing anything

I am a bit confused right now

do you want me to share my screen

Message #general

I am not changing anything
I am a bit confused right now
do you want me to share my screen
sure
Do you all see my screen

Hami Chauhan Yesterday at 9:16 PM

db_Deploy
Ok let me do that
just a sec
but where do we get the ip for the hostname though
ok thank you
sure
so dbname would be what?

Mario_Levano Yesterday at 9:24 PM

\$conn = new mysqli(\$servername, \$username, \$password, \$dbname);

```
if ($conn->connect_error) {  
    die("Connection failed: " . $conn->connect_error);  
}  
return $conn;  
}
```

Hami Chauhan Yesterday at 9:26 PM

only 3 that I have stated in the code
yes

Mario_Levano Yesterday at 9:32 PM

#!/bin/bash

Hami Chauhan Yesterday at 9:32 PM

ok

Mario_Levano Yesterday at 9:33 PM

WATCH_DIR="/home/hami"

brb, getting food

Hami Chauhan Yesterday at 9:38 PM

no problem

let me know when you are back

Mario_Levano Yesterday at 9:42 PM

I am back, just going to be typing since i am eating

Hami Chauhan Yesterday at 9:42 PM

Ok sure

So do you want me to share my screen

Mario_Levano Yesterday at 9:43 PM

Message #general

Mario_Levano Yesterday at 9:43PM
ok

Quintilium Yesterday at 9:44PM
brb

Mario_Levano Yesterday at 9:44PM
PHP_SCRIPT="place path of the InsertIntoTable script"

Hami Chauhan Yesterday at 9:44PM
ok

Quintilium Yesterday at 9:46PM
back

Hami Chauhan Yesterday at 9:47PM
I did

Mario_Levano Yesterday at 9:47PM
did you put it in quotations? this thing -> ""

Hami Chauhan Yesterday at 9:48 PM
yes

Mario_Levano Yesterday at 9:48PM
ok
if [! -d "\$WATCH_DIR"]; then
 echo "Directory \$WATCH_DIR does not exist. Exiting."
 exit 1
fi

This is to make sure that the directory exists

Hami Chauhan Yesterday at 9:50 PM
ok

Mario_Levano Yesterday at 9:51PM
inotifywait -m -e create "\$WATCH_DIR" --format '%f' | while read FILE
do
 echo "New file detected: \$FILE"
 php "\$PHP_SCRIPT" "\$FILE"
done

this last part is where it uses inotifywait to start detecting when a bundle is sent

Hami Chauhan Yesterday at 9:51PM
yes
done

Mario_Levano Yesterday at 9:53PM
ok, now this is the part where we turn it into a service that will be active while the VM is on

Message #general

do this, and after the +x would be the path to the script

chmod +x

this is done in the terminal

Hami Chauhan Yesterday at 9:55 PM

ok you want me to do this in the terminal correct?

Mario_Levano Yesterday at 9:55 PM

yes

Hami Chauhan Yesterday at 9:55 PM

ok

Mario_Levano Yesterday at 9:57PM

not that script, the one that was just made
for the detection (edited)

Hami Chauhan Yesterday at 9:57PM

But where would I find the path for that?

Mario_Levano Yesterday at 9:58 PM

did you just do a pull request?

Hami Chauhan Yesterday at 9:58 PM

yes

Mario_Levano Yesterday at 9:58PM

go to where the .sh script is and copy the file path

Hami Chauhan Yesterday at 9:59 PM

I did

Mario_Levano Yesterday at 10:00PM

ok, now do this in the terminal

```
sudo nano /etc/systemd/system/bundle-watcher.service
```

[Unit]

Description=Bundle Watcher Service

After=network.target mysql.service

[Service]

ExecStart=

WorkingDirectory=/home/hami

User=hami

Restart=always

RestartSec=5

[Install]

WantedBy=multi-user.target

The ExecStart should have the path directly to the bundle

o wait, my bad, the path to the script

Message #general

Hami Chauhan Yesterday at 10:04PM
the path to the trackBundle.sh?

Mario_Levano Yesterday at 10:04PM
yes
after you're done with that, then do

```
sudo systemctl daemon-reload
sudo systemctl start bundle-watcher.service
sudo systemctl status bundle-watcher.service
you were supposed to do those commands one at a time, but ok
```

Hami Chauhan Yesterday at 10:09PM

```
sudo systemctl daemon-reload
sudo systemctl start bundle-watcher.service
sudo systemctl status bundle-watcher.service
● bundle-watcher.service - Bundle Watcher Service
   Loaded: loaded (/etc/systemd/system/bundle-watcher.service; disabled; pres>
     Active: activating (auto-restart) (Result: exit-code) since Wed 2024-12-18>
       Process: 83144 ExecStart=/home/hami/Documents/Github/rabbitmqphp_example/Bu>
      Main PID: 83144 (code=exited, status=203/EXEC)
        CPU: 10ms

Dec 18 22:06:38 hami-VirtualBox systemd[1]: bundle-watcher.service: Main process >
Dec 18 22:06:38 hami-VirtualBox systemd[1]: bundle-watcher.service: Failed with >
Dec 18 22:06:38 hami-VirtualBox systemd[1]: /etc/systemd/system/bundle-watcher.>
lines 1-10/10 (END)
```

Mario_Levano Yesterday at 10:09PM
let me see the script again

Hami Chauhan Yesterday at 10:12PM
the service script

Mario_Levano Yesterday at 10:12PM
that and the bundle script

Hami Chauhan Yesterday at 10:12PM
sure

```
Code Blame 19 lines (12 loc) · 415 Bytes Code 55% faster with GitHub Copilot
1 #!/bin/bash
2
3 WATCH_DIR="/home/hami"
4
5 script = "/home/hami/Documents/Github/rabbitmqphp_example/Bundler_Installer/Bundler_Installer/InsertIntoTable- Deployment.php"
6
7 if [ ! -d "$WATCH_DIR" ]; then
8   echo "Directory $WATCH_DIR does not exist. Exiting."
9   exit 1
10 fi
11
12 inotifywait -m -e create "$WATCH_DIR" --format '%f' | while read FILE
13 do
14   echo "New file detected: $FILE"
15   php "$PHP_SCRIPT" "$FILE"
16 done
```

Mario_Levano Yesterday at 10:13PM
line 15, change the PHP_SCRIPT to script, keep the \$
then pull again when you're done
i'll brb

drewrod34 Yesterday at 10:17PM
I'm gonna go to sleep now, just to get ready for tomorrow
Also, whoever made the server, make sure to get all the chat logs in csv format too

Rahul Yesterday at 10:18PM
before you go, we still have to create a video and also in general i dont think we even have a system that is working
i am still trying to understand what we are goig to show him tomorrow

Hami Chauhan Yesterday at 10:18PM
we will try to get the deployment done
do you want me to run these commands again sudo systemctl daemon-reload
sudo systemctl start bundle-watcher.service
sudo systemctl status bundle-watcher.service

drewrod34 Yesterday at 10:19PM
We don't really have to talk I think, and I don't have anything physical either

drewrod34 Yesterday at 10:19PM
The same stuff as the video, so everything working and stuff

Hami Chauhan Yesterday at 10:20PM
@Mario_Levano do you want me to run these commands again sudo systemctl daemon-reload
sudo systemctl start bundle-watcher.service
sudo systemctl status bundle-watcher.service

drewrod34 Yesterday at 10:20PM
Anyway, also include the stuff from the scrum journals on canvas, for the pre midterm stuff

Hami Chauhan Yesterday at 10:20PM
I think scrum journals are upto date

drewrod34 Yesterday at 10:20PM
So the changelog is complete

Hami Chauhan Yesterday at 10:20PM
ok will do

Mario_Levano Yesterday at 10:21PM
No, only sudo systemctl restart bundle-watcher.service, then do the status one again

Hami Chauhan Yesterday at 10:21PM
ok
the status is active now
@Mario_Levano what do I do next

Mario_Levano Yesterday at 10:23PM
Are there no errors?

Hami Chauhan Yesterday at 10:23PM
You're viewing older messages

general

Hami Chauhan Yesterday at 10:21PM

ok

the status is active now

@Mario_Levano what do I do next

Mario_Levano Yesterday at 10:23PM

Are there no errors?

Hami Chauhan Yesterday at 10:25PM

no

Mario_Levano Yesterday at 10:25 PM

Ok, give me a bit then, I stepped out of my room

Hami Chauhan Yesterday at 10:25PM

```
hami@hami-VirtualBox:~$ sudo systemctl restart bundle-watcher.service
hami@hami-VirtualBox:~$ sudo systemctl status bundle-watcher.service
● bundle-watcher.service - Bundle Watcher Service
   Loaded: loaded (/etc/systemd/system/bundle-watcher.service; disabled; preset: enabled)
   Active: active (running) since Wed 2024-12-18 22:20:54 EST; 4ms ago

Dec 18 22:20:54 hami-VirtualBox systemd[1]: Started bundle-watcher.service - Bundle Watcher Service.
Dec 18 22:20:54 hami-VirtualBox systemd[1]: bundle-watcher.service: Main process exited, code=exited, status=203/EXEC
Dec 18 22:20:54 hami-VirtualBox systemd[1]: bundle-watcher.service: Failed with result 'exit-code'.
hami@hami-VirtualBox:~$
```

Mario_Levano Yesterday at 10:26 PM

That looks like an error

Give me a moment, I'll be back in my room in a bit

Hami Chauhan Yesterday at 10:26PM

ok

Everyone write your names on the change logs. I already said it so many times

Quintilium Yesterday at 10:35PM

i thought i did

Hami Chauhan Yesterday at 10:42PM

I am really very unwell and on medications and cannot stay online for longer than this.

Quintilium Yesterday at 10:45PM

If you need to go that's understandable

Mario_Levano Yesterday at 10:46 PM

ok, im finally back, im really sorry about the delay

if you really have to go, then ok, just hope you feel better for tomorrow

Hami Chauhan Yesterday at 10:51PM

Thank you all for your understanding. I really appreciate it. I still think that there change log is completely not done. So please if you all have anything more to add, do add tonight.

Because I will be doing it first thing in the morning

tommorow at around 7
